Experience

Cerner Corporation - Kansas City, MO
Associate Senior Software Engineer - September 2018 - Present
Associate Software Engineer - August 2016 - August 2018
- Developed MySQL-backed microservices for a new solution to help patients manage their health plan across multiple providers.
- Implemented and documented APIs for internal and external consumers.
- Mentored new associates in best code practices, new technologies, and professionalism.
- Worked independently to successfully release a service to automate performance reporting for Medicare providers.
- Enhanced existing big data services with new features and reliability improvements.
- Resolved production support issues to identify defects and ensure service availability.

Software Intern - Summer 2014 & Summer 2015
- Refactored backend server call framework with a new interface and multi-threading to simplify new backend calls and improve performance.
- Added and updated J-Unit tests to ensure backend functionality and assist in the creation of new tests.
